Profile Summary

Information Science graduate with hands-on experience in Python, SQL, Software Development, and Data Analytics. Familiar with Git/GitHub, version control systems, SDLC, Agile methodologies. Strong problem-solving skills with experience building end-to-end software and data-driven applications through academic and personal projects.

Education

Bangalore Institute of Technology - Bachelor of Engineering in Information Science and Engineering- (CGPA: 8.19) | Jun 2025

PVP Polytechnic - Diploma in Information Science and Technology- (Percentage: 82.24) | Oct 2022

Internship

Py-Spiders | Apr 2025 – Jul 2025

Data Analytic Intern

- Completed intensive, hands-on training in Python, SQL, Power BI, Pandas, and NumPy.
- Involved in solving practical tasks and mini-projects designed to simulate real-world data analytics scenarios.
- Gained experience in data wrangling, analysis, and dashboard creation with industry-standard tools.

Princeton Smart Engineers | Oct 2023 - Nov 2023

Data Science Intern

- Participated in the design and development of data-driven models.
- Utilized programming languages and tools such as Python and machine learning libraries to implement data models.

Projects

Respiratory Disease Classification Using CNN

GitHub

- Developed a deep learning model using Convolutional Neural Networks (CNN) to classify respiratory sounds such as wheezes and crackles for early detection of lung diseases.
- Preprocessed audio data and transformed it into Mel-spectrograms for effective feature extraction and training.
- Achieved high classification accuracy by implementing and fine-tuning the CNN model using TensorFlow and Keras frameworks.

AI-Powered RAG PDF Question Answering System

GitHub

- Built an end-to-end Retrieval-Augmented Generation (RAG) system for PDF-based question answering, including text extraction, chunking, embeddings, and vector search.
- Used FAISS for similarity search and Sentence Transformers for generating embeddings.
- Integrated FLAN-T5 model for contextual answer generation and developed Streamlit UI for real-time querying.

HR Data Analytics using Power BI

GitHub

- Cleaned and transformed HR data using Power Query, handling missing values and standardizing formats.
- Created DAX measures to analyze attrition, retention, and workforce trends.
- Developed interactive dashboards with filters and slicers for demographics, department performance, and diversity insights.
- Generated actionable insights on distribution, growth trends, and retention patterns to support data-driven decision-making.

Library Management System (PostgreSQL)

GitHub

- Designed a relational database with 6+ tables, ensuring proper relationships and data integrity.
- Developed 15+ SQL queries using JOINS, subqueries, and aggregations to manage and analyze data.
- Implemented business logic like overdue tracking and unreturned books, and used CTAS for summary reporting.

Technical Skills

Languages: Python, SQL

Tools & Frameworks: VS Code, Git, GitHub, Version Control, Hugging Face (basic)

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI (dashboards, Power Query, DAX)

Core Concepts: Data Science, Machine Learning, SDLC, Agile Methodology, Object-Oriented Programming, Basic understanding of NLP, Transformers, LLMs, RAG, CI/CD

Soft Skills: Communication, Stakeholder Collaboration, Problem Solving, Adaptability, Leadership, Teamwork
